Welcome to
INTERNSHIP STUDIO

Module 04 | Lesson 01
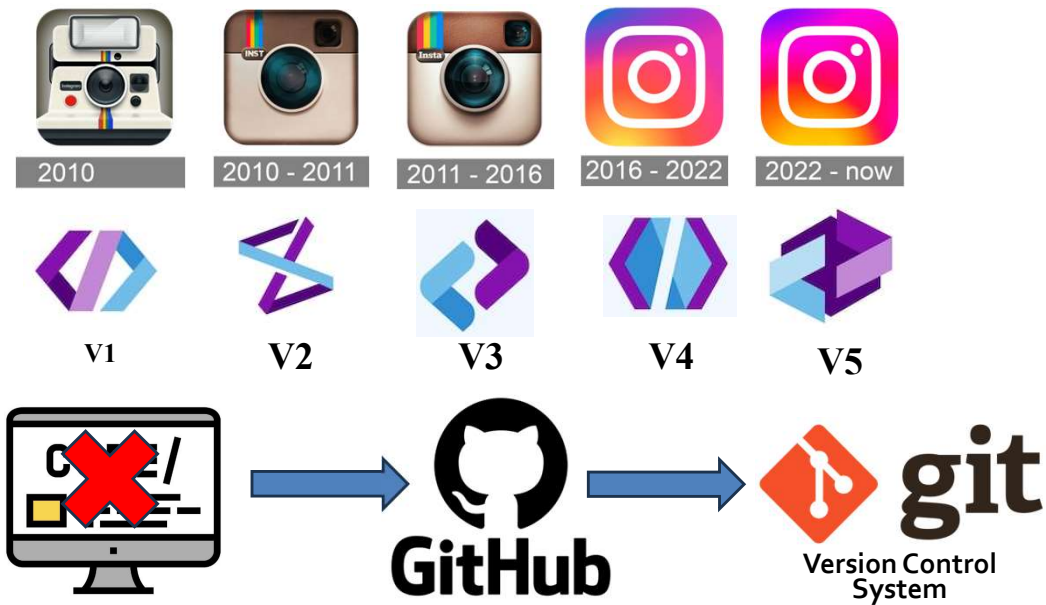

GIT

Topics

1. GIT Introduction
2. Version Control System
3. Types of VCS

Global **I**nformation **T**racker

2010   2010 - 2011   2011 - 2016   2016 - 2022   2022 - now

V1   V2   V3   V4   V5

GitHub → git
Version Control System

Version Control System

- VCS records the changes made to our code over time in a special database called Repository.
- We can see the project history and get to know who has made what kind of changes, when, and why.
  - If you don't want those changes we can roll back to the previous version.
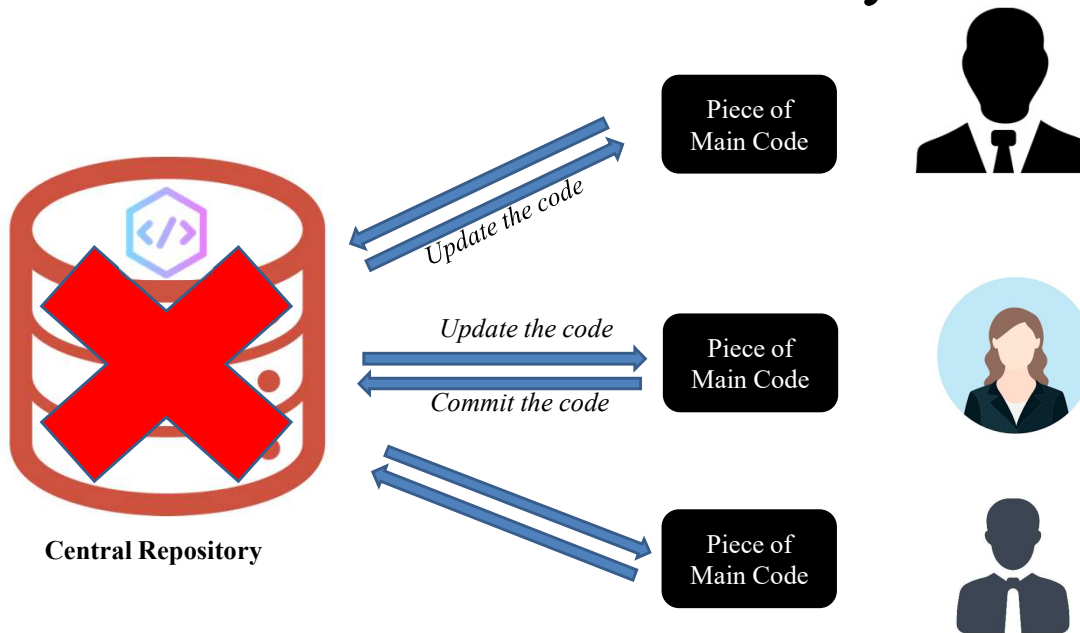

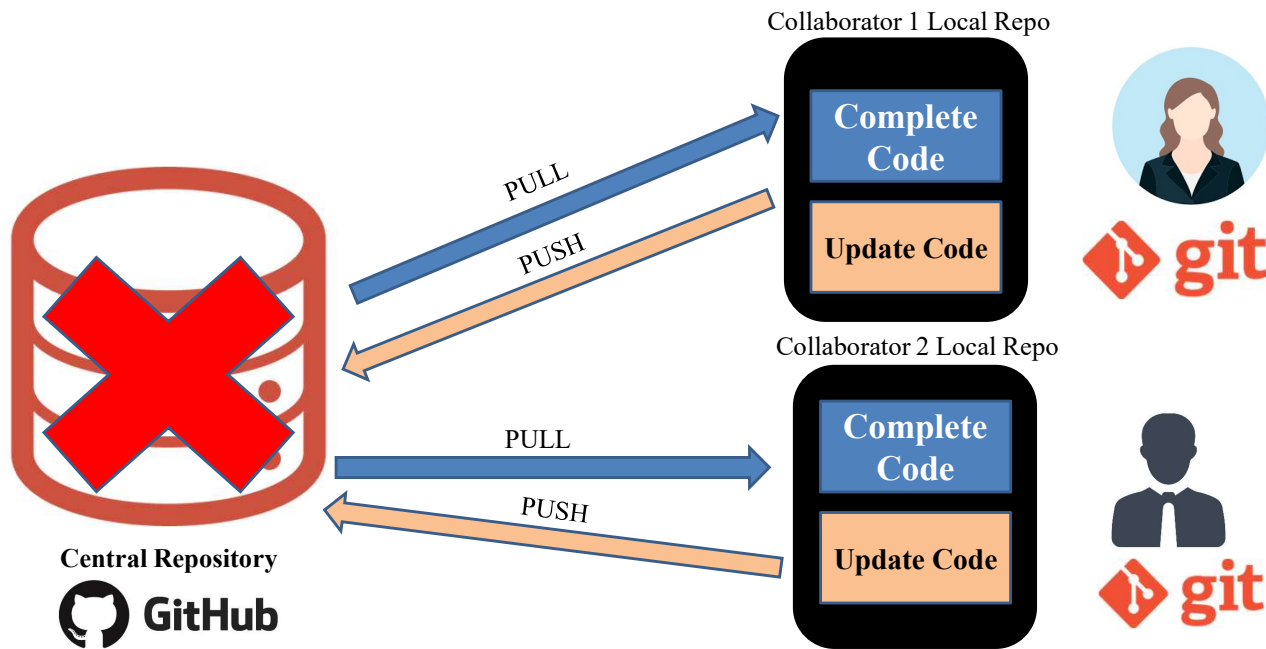

VCS - Types

1. Local Version Control System

VCS - Types

2. Centralized Version Control System

VCS - Types

3. Distributed Version Control System

SUMMARY

You got this

1. GIT – Part 1
